I. THE PROBLEM. Page 5.

1. Previous studies.
2. Purpose of present study.

II. THE DATA. Page 6.

1. Weekly compositions from third and fourth grade pupils of I.Q's varying from above 120 to below 80, from which is tabulated
   (1) The different words used by each individual.
   (2) It's Thorndike credit number.
   (3) The misspelled words.
   (4) The subjects of the compositions.
2. The I.Q. of the individual child obtained for
   (1) Grade 3, by the writer as part of the assignment in Dr. Wilson's Measurement group.
   (2) Grade 4, through the cooperation of Mr. Kallum's office.

III. THE SUMMARIZATION. Page 258.

IV. THE CONCLUSION. Page 303.

A STUDY OF THE WRITING VOCABULARIES OF CHILDREN WITH I.Q's RANGING FROM ABOVE 120 TO BELOW 80.

I. The Problem:

What are the writing vocabularies of pupils of various I.Q's? In the field of vocabulary research to date there have been nearly fifty investigations which contribute to the following fact knowledge:-

1. The words most frequently written in life outside of school.

2. The words most frequently used in the writing done in school.

3. The significance for purposes of spelling of the words found in investigations

(a) Of the vocabulary of reading,

(b) Of the vocabulary of spelling,

(c) Of the vocabulary needed in connection with other subjects.

In addition to these studies of Rice, Eldridge, Knowels, Jones' Ayres, Cook and O'Shea, besides Horn, Thorndike and the others, there have been from time to time various compilations which included all previous studies.

From the nature of these investigations it may be seen that the problem of determining the words used by people of different abilities is a problem for further research,- the problem with which this study is concerned.

II. The Data:

For the purposes of this investigation the writing vocabularies of fifty children, twenty-five third grade and twenty-five fourth grade children of the Dearborn School District, Boston, were studied. These children live in the heart of the city and come in large part from very poor homes.

After securing the I.Q. of each individual child, weekly written compositions,- free expressions, were gathered from the children and the following facts compiled.

1. The different words used by each individual and their Thorndike credit number.

2. The number of running words.

3. The misspelled words.

4. The subjects of the compositions.

The foregoing information was tabulated as follows:

1. The subjects of the compositions according to the I.Q.

2. The words of the individual child tabulated according to the I.Q. and the grade.

3. The words of the individual child tabulated according to the I.Q. and the age.

Tabulations follow:-

1. The Subjects of the Compositions According to the I.Q.

IV THE CONCLUSION.

Tabulation of Running Words and Separate Words.

I. Q.	Number of Pupils	Running Words	Separate Words	Ratio
Above 120	8	2,191	758	.34
110 - 120	9	2,070	621	.31
90 - 110	9	1,955	567	.29
85 - 90	8	1,218	304	.25
80 - 85	8	900	163	.18
Below 80	8	1,652	152	.09

IV. THE CONCLUSION. (Continued)

1. Running Words:

8 pupils having an I. Q. above 120 used 2,191 running words.

8 pupils having an I. Q. below 80 used 1,652 running words.

Therefore, the children of I. Q. below 80 used 75% of the running words of children above 120.

2. Different Words:

Total number of different words = 1,032.

8 pupils of I. Q. above 120 used 758 different words.

8 pupils of I. Q. below 80 used 152 different words.

Therefore, the children of I. Q. below 80 used 20% of the different words of children above 120.

3. It will be noted that while the variation in the number of running words used by children of different I. Q. is not great, the variation in the number of different words used is very great.

4. As further evidence of the high positive correlation which exists between the I. Q. and the spelling vocabulary of the individual child, the Thorndike check may be noted. It will be found that with the exception of

1. banner
2. bat
3. bought
4. cat
5. caught
6. couldn't
7. doll
8. fun
9. kitten

all of the 152 different words of the below 80 group fall within the first thousand most common words, while in the group above 120, 328 words fall outside the first 1,000 most common words.

5. From the evidence submitted it would appear that in their writing vocabularies children of low I. Q. use only the most common words, and that they use fewer words than children of high I. Q. Hence, they need to know how to spell fewer words. Therefore, it is probable spelling vocabularies should vary according to the I. Q. of the individual child.
